IHSA 82-007

9 February 1982

MEMORANDUM FOR:

Chief, Management Staff, ODP

STAT

FROM:

Information Handling Systems Architect

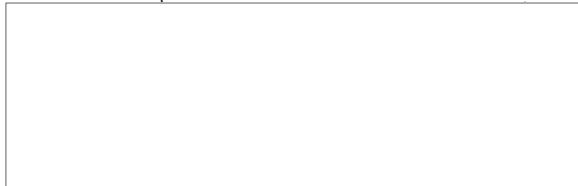

STAT

SUBJECT: Proposed Community Intelligence Reporting Format

REFERENCE: Subject Report dated 28 December 1981

1. It is very encouraging to learn that the IHC is progressing toward adoption of a standard electrical intelligence reporting format, using the EMFWG proposal as a basis. It is an important and badly needed step towards standardization. Once implemented, it will provide substantial savings in the software costs of future information systems, both here in the Agency and throughout the Intelligence Community.

2. The IHSA staff has no editorial comment to offer with respect to the referent document.
